

Notes:

1. Z is optional 10K resistor to add if operation is intermittent on H89A/H19A.
2. Cx is optional 1000pF capacitor to be installed if repeat is not desired for function keys.
3. Point S is for adding external defeat switch to turn off autorepeat.
4. See original manual at https://sebhq.github.io/sebhq/documentation/supplemental/AnaPro_AutoKeyRepeat.pdf

TITLE: H89/H19 Automatic Key Repeat		REV: 1.0
